FluentAssertions replace with Shouldly

Just press cmd+H in Visual Studio and replace [crayon-67fdealacb5aa822853999/] and [crayon-67fdealacb5af353349827/] 99% percent of the errors should be gone.

If you like to stay with FluentAssertions (which I do not recommend), open your .csproj file and put brackets around the version. This will prevent you upgrading to version 8 [crayon-67fdealacb5b0344911680/]
